

Temprotech provide flame retardant temporary protection materials and technologies that meet the exacting demands of the Cruise, Ferry, Naval, Megayacht and Offshore markets.

It is essential that newbuilding, outfitting and refurbishment projects are carried out on time and within budgetary constraints. Accidental damage and soiling from heavy traffic, weather, dust, debris and spillages can necessitate the costly and time consuming replacement or repair to finished surfaces, equipment and environments. Temprotech's materials and technologies help to ensure such damage, expenditure and delays are minimised.

Our product portfolio offers a range of flame retardant temporary protection materials to assist shipowners, operators and managers, yards, contractors and outfitters in the continued drive towards total protection and fire safety.

#### HIGH PERFORMANCE ADHESIVE TAPE (FAR, DEF. STAN. and Nuclear approved)

Temprotech supply a wide range of adhesive tapes. Different combinations and weights of base materials, coatings and adhesives result in tapes with the performance characteristics and qualities to match your specific application; fixing, marking, sealing, securing, ducting, wrapping, masking, holding, joining, insulating, heat reflecting, facing and vapour barriers etc.

**Heavy through to light and 'clean-peel' adhesion levels  
25mm to 100mm standard widths, custom size rolls and sheets  
PVC, poly-coated cloth, foam, aluminium and reinforced base materials  
Conformable, abrasion resistant, 'hand-tearable', non-splitting  
UV resistant, waterproof and flame retardant grades  
Defence Standard and Nuclear approved**
