

Lows on board

November 2003

During the second day of Shiprepair and Conversion, Temprotech welcomed Scott Sutherland from Lows of Dundee to their exhibition stand.

Lows of Dundee are rightly proud of their reputation for both service and quality of the coated fabrics and materials they supply. Scott Sutherland (Sales Manager) was attending in order to finalise negotiations with Temprotech and to put ink to paper on an exclusive distribution agreement for the marine industry.

Temprotech currently supply a range of scaffold cladding and containment materials to the Marine and Offshore markets and believe that the range of products, technical support and expertise offered by Lows will enable them to go from strength to strength.
