
Supplier Open House

August 2003

The paint had barely dried on Temprotech's new premises when they played host to representatives from a number of their manufacturing partners and suppliers.

The Open House was intended as a platform to educate suppliers on the status of the Marine and Offshore markets upon which Temprotech have focused, provide an opportunity for participants to meet each other and learn more about the respective products and technologies they have developed for Temprotech. There are real opportunities for technology transfer between the manufacturing partners and such meetings have proved to be a catalyst for further product developments.

Once business was out of the way, all participants enjoyed the thrills (and a few spills) of go-kart racing at the nearby Thruxton Race Track. The day came to a close with a meal, a few drinks and 'lively' discussion of the days events. Temprotech would like to thank all everyone involved for their time, support and helping to make this inaugural event such a success.
