temporary protection technologies

TEMPROTECH

Temprotech provides total solutions in flame retardant temporary protection that meet the exacting demands of the forward-thinking players in the Cruise, Ferry and Megayacht markets.

During newbuilding and outfitting or periods of drydocking, refurbishment, maintenance and repair it is essential that projects are carried out on time and within budgetary constraints. Accidental damage caused by work and trades, soiling from heavy traffic, dust, debris and spillages can necessitate the costly and time consuming replacement or repair to finished surfaces and environments. Adopting appropriate protection methods and technologies can help to ensure that such damage, expenditure and delays are minimised.

TOTAL SOLUTIONS

Temprotech aim to provide their customers with total solutions that meet all aspects of their temporary protection needs; planning and surveying; understanding their requirements; identifying and developing appropriate technologies; supply, stock and logistics management and, above all else, optimum levels of service and protection.

PERFORMANCE AND APPROVALS

All Temprotech products have been rigorously tested to determine their suitability and position within our technology portfolio. Flame retardant and protective qualities are of prime importance, but are not the only criteria on which products are judged. Manufacturing consistency, materials handling, ease of application, performance, durability, total cost of ownership and return on investment etc. are all carefully considered before products are submitted for International Fire Approval, Certification and eventual acceptance into our portfolio.

Temprotech products are approved to LPS1207 Small Flame Test BS476 Part 12:1991, Large Flame Test BS5852 Crib 7, Smoke & Toxicity EN2825 & EN2826 and Oxygen Index - BS2782, Part 1 Method 141, 1986 (ISO4589-1984) or higher including M1 Norms and Class '0' rating.

PRODUCT DEVELOPMENT

We firmly believe that the key to product development is to listen. We take a great deal of care and time to listen to our customers, end users and manufacturing partners. Your requirements, comments and suggestions combined with our product knowledge and market experience enable us to develop bespoke solutions and bring to market new products that are innovative, cost-effective and in demand.

QUALITY OF SERVICE

Even the ultimate in protective materials is of little value if it isn't delivered on time or cannot be supplied in the quantities or dimensions required. Temprotech provide all of their customers, large and small, with a quality of service and support that is worthy of their technology portfolio.

EXPERTISE AND CONSULTANCY

The experience and expertise gained over many years in the development and provision of flame retardant temporary protection technologies to the shipbuilding and shiprepair industries is made available to all our customers via the Technical Assistance Centre.

TECHNOLOGY PORTFOLIO

EXPANSIVE LAYFLAT SHEETING
75-300 micron, 4m folded x 50m rolls

ADHESIVE BACKED FILM
120 micron, 1m x 200m rolls

SOLID FLOOR PROTECTION
500 and 800 micron, 1.2m x 50m rolls
also available in 1.22m x 2.44m boards

CORREX FLUTED BOARD SHEET
2-10mm, 1.22m x 2.44m boards

HIGH, MEDIUM AND LOW DENSITY FOAM
5-10mm, 1.5m x 100m rolls

DOUBLE AND TRIPLE LAYER BUBBLE WRAP
5-10mm bubble, 1.5m x 100m rolls

FIRE, WELD AND SMOKE BLANKET
100-1000g, 1m x 50m rolls

REINFORCED SCAFFOLD SHEETING
200-750 micron, 2m x 50m rolls

HIGH PERFORMANCE ADHESIVE TAPE
50, 75 and 100mm x 100m rolls

total solutions in flame retardant
temporary protection technology
